

# 1st AID

Managing  
a ski resorts  
first aid  
reports and  
dispatch  
calls

## peak ideas

### **1st AID was created to assist ski patrollers with the documents required by regulatory agencies**

1st AID software streamlines patient care records needed to track by a ski resort as well as dispatch call management.

- Collaborative patient care records management
- Print forms directly from the application
- Easy selection of patient issues and treatments with our customized value lists
- Email forms directly from the system
- View Dispatch Calls, Trails and Lifts marked for closure
- Perform reports on accident metrics
- Create global value lists for all users to utilize
- Available on demand or installed on your own server
- Easy deployment; fast startup
- Operates on Mac, Windows, iPad and iPhone

**There is only ONE  
reason you need 1st  
AID.**

**IT'S TIME.**

## Why You Should Use 1st AID

The bottom line is that 1st AID saves time, reduces costs and improves results. Here's how:

### Improve Form Generating

Documentation about patient care records is easily created and stored for all allowed users to view.

### Improve Accountability

Meet the accountability demands of senior management or regularity bodies quickly and easily.

### Improve Hill Management

Manage dispatch calls, trail closures, and staff at a glance and the click of a button.

### Achieve Fast Results

1st AID is simple to install and customize. Get an immediate impact on productivity and patient care tracking.

### Safeguard Important Information

Extremely sensitive information is secure. Control who gets access to sensitive and valuable data.

### Technology/Requirements

1st AID is simple to deploy, and has modest requirements. 1st AID minimizes the need for IT involvement and support. Rapid deployment means less work for IT, and immediate results for the marketing department. 1st AID' architecture minimizes network traffic. Efficient design reduces storage requirements.

### Requirements On Demand

Leave all the work to us. No server is required. All users need is a computer with FileMaker Pro client.

### In-house Server

If you choose to run 1st Aid on an in-house server, a FileMaker Server is required.

The screenshot shows the 1st AID software interface. At the top left is the 'peak ideas' logo. The user is logged in as 'GPC Peak'. The interface includes a 'Dispatch Info' section with fields for Weather (Base, Mid, Top), Description, Notes, Snowfall (cm, Base, Top), Trails, and Lifts. Below this is a table with columns for 'Dispatch Calls', 'Trails / Lifts', and 'Sweeps / Grooming'. The 'Dispatch Calls' table has columns for Time, Initial, Report, Location, Caller, and Patrol. The bottom of the interface shows a navigation bar with icons for home, search, and other functions.

The screenshot shows a detailed incident form for 'Teste Test'. The incident number is 341, and the user is 'Primary CST Admin'. The form includes sections for Dispatch Info (Responder, Reason, Response), Scene Info (Trail, Patient Condition), Transport (To Base, From Base, Notes), Destination (Type, Patient Released), and Times (Time of Call, Arrived at Scene, Departed Scene, Arrived at Base). A large digital display shows the time '01:28' in HHMM format. The form is marked as 'Closed' at the bottom.

There is only ONE  
reason you need 1st  
AID.

IT'S TIME.
